a short history of monks and monasteries by alfred wesley wishart the aim of this volume is to sketch the history of the monastic institution from its origin to its overthrow in the reformation period for although the institution is by no means now extinct its power was practically broken in the sixteenth century and no new orders of importance or new types have arisen since that time a little reflection will enable one to understand the great difficulties in the execution of so broad a purpose it was impracticable in the majority of instances to consult original sources although intermediate authorities have been studied as widely as possible and the greatest caution has been exercised to avoid those errors which naturally arise from the use of such avenues of information it was also deemed inadvisable to burden the work with numerous notes and citations such notes as were necessary to a true unfolding of the subject will be found in the appendix a presentation of the salient features of the whole history was essential to a proper conception of the orderly development of the ascetic ideal to understand the monastic institution one must not only study the isolated anchorite seeking a victory over a sinful self in the egyptian desert or the monk in the secluded cloister but he must also trace the fortunes of ascetic organizations involving multitudes of men vast aggregations of wealth and surviving the rise and fall of empires almost every phase of human life is encountered in such an undertaking attention is divided between hermits beggars diplomatists statesmen professors missionaries and pontiffs it is hoped the critical or literary student will appreciate the immense difficulties of an attempt to paint so vast a scene on so small a canvas no other claim is made upon his benevolence

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

the book presents the results of my in depth researches on late antique egyptian monasticism in fact it is my third book dealing with this fascinating phenomenon here like in my two earlier books on the subject i have reworked some of the previously published ideas or texts of mine and in effect my own understanding of the topic has evolved and changed owing to the discoveries of both textual and archaeological sources and to new interpretations of the already known data the first book *moines et communautés monastiques en Égypte ive viiie siècles* was published in 2009 and focused primarily on the physical aspects of monastic life the geographical conditions of monastic communities and on their economic activity in it i dedicated ample space to the questions of terminology particularly to the terms referred to monastic groupings their leaders and members responsible for performing specific duties while writing that book i perused a vast number of literary texts available in various languages but pride of place was given to documentary evidence preserved in the form of papyri ostraca and limestone or wooden writing tablets my intention was also to provide readers with information on places with surviving remnants of monasteries or hermitages and thus expand the database for want of a better word of egyptian monasticism by taking into account this particular category of archaeological evidence the second book owes its origin to the request i received from the publishing house of the benedictine abbey of tyniec to write a volume on egyptian monasticism in polish it was partly based on chapters contained in the french book but a substantial portion of the polish book consisted of new material dealing in a greater detail with the foundational monastic texts such as the apophthegms the life of

antony by athanasius of alexandria historia lausiaca by palladius the writings of john cassian the invaluable and extensive dossier of the pachomian congregation and the works written by shenoute the book includes a presentation of ascetic doctrines a topic which was only tangentially addressed in moines et communautés monastiques heedful of the usual rigours of research work i nevertheless reduced the reference apparatus the footnotes specifically so as not to discourage the non specialist readers interested in the topic it was released in 2014 with the title drugi dar nilu czyli o mnichach i klasztorach w późno antycznym egipcie the second gift of the Nile monks and monasteries in late antique Egypt the first part of the title was proposed by the benedictines while the other was added slightly pedantically by myself once the work on that book was completed i was more happy with the result than was the case with its predecessor it seemed to me that the Polish book provided the reader with a greater wealth of information interpreted in a much more mature manner even in spite of the fact that i had to leave out some material especially my discussions of archaeological sources as this time i could not include any illustrations this particular book has emanated from the Tyniec book much in the same way as the Tyniec one did from the volume written in French it is largely composed of English translations of rearranged reworked revised and enriched individual chapters of its Polish predecessor more attention is given here to the first congregation of Pachomian monasteries and the federation of three monastic establishments governed by Shenoute the part on monastic economy has been expanded which reflects my belief that this aspect of the phenomenon in question can usher us into the real reality of the communities as opposed to the reality depicted in monastic literature or in theoretical writings on asceticism it goes without saying that i have also added references to newly published studies on the subject all the while respecting the principle of keeping the bibliography selective and resisting the temptation of excessively expanding the footnotes the chronological scope of the book extends to the mid eighth century or thereabouts the Arab conquest had an immense impact on life in Egypt in a multitude of aspects but on the whole its monastic circles were not significantly affected one cannot escape this impression while reading the letters written in Coptic in the first half of the eighth century found in Western Thebes particularly the dossier of Frange in my view at least the image of life in Egyptian monasteries which emerges from those documents is not significantly different from what can be inferred from texts written a hundred years earlier from the author's foreword
